Venus® Pearl

Beauty beyond aesthetics.

The new standard of care with its creamy consistency:
Venus Pearl nano-hybrid composite.

- » **Easy and convenient handling:** The creamy, low-stick consistency offers optimal stability and perfect sculptability, with a suitably long working time – that goes without saying.
- » **Outstanding physical properties:** Its innovative formula promises long-lasting, aesthetically pleasing restorations with a permanent, natural lustre.
- » **Impressive aesthetics:** The material adapts perfectly to the colour of the surrounding teeth, creating an outstandingly natural look. Your patients will be delighted – and so will you!

Giving a hand to oral health.

KULZER
MITSUI CHEMICALS GROUP

Venus® Pearl –

Beauty beyond aesthetics. The cream of composites.

We deliver highly aesthetic nano-hybrid composites whatever your preference: a creamy consistency in the form of Venus Pearl, or a firmer consistency with Venus Diamond. Whichever you choose, the ease of use and outstanding physical properties remain the same.

- Outstanding physical properties:** A unique matrix and newly developed nano-hybrid filler system lead to improvements in aesthetics, durability and handling. Exceptional strength, minimal shrinkage stress, very smooth surfaces, high tough resistance and optimised surface hardness are the features that render Venus composite restorations so reliable.
- Pure aesthetics:** Discover the new standard of care that will help you master your daily challenges. Venus Diamond and Venus Pearl can be used in single- or multi-layer techniques. Using a multi-layer technique, you can take advantage of the full range of their aesthetic benefits. Venus Diamond and Venus Pearl adapt perfectly to the colour of the surrounding tooth structure, creating an outstandingly natural look.
- Easy and convenient handling:** Both composites are highly stable, offer a longer working time (also under the operating light) and have a very low-stick consistency, even in the creamy format of Venus Pearl. Excellent sculptability and polishing are further features of the two composites. The creation of direct as well as indirect restorations is simpler and therefore more efficient on your part.

Venus Pearl: Pure aesthetics that anyone can enjoy.
